

TOSOH QUARTZ

Injection Molded Quartz

Characteristics of Injection Molded Quartz:

- 100% quartz glass (amorphous) products.
- 'Industrial' and 'Clean' grades currently available.
- Complicated features can be made from the injection molding process.
- Typically no additional machining is needed.
- Currently available in shapes of up to 60 mm cubed.
- Suitable for high volume manufacturing because of high mold cost.
- White, Opaque and Black Quartz materials available
